

LAB 1

DevOps Foundations & Continuous Integration

Task 4 - Install and Configure Git and Jenkins

Student: **Kunal**

Objective

Install and configure Git on Ubuntu Linux, verify the installation, configure the global Git identity, install Java required by Jenkins, install Jenkins, and verify that the Jenkins service is enabled and running.

Environment: Ubuntu 24.04.4 LTS (WSL2) **Git:** 2.43.0 **Jenkins:** 2.568.3 **Java:** OpenJDK 21

1. Ubuntu Linux Environment and Student Verification

Ubuntu 24.04.4 LTS was verified using **lsb_release -a**. The terminal also records the student label, current Linux user, and date. This establishes the working environment used for the lab.

2. Git Installation and Version Verification

Git was installed and its version was verified successfully. The terminal output reports **git version 2.43.0**, confirming that Git is available for version-control operations.

3. Global Git Configuration

The global Git configuration was verified using **git config --global --list**. The configured global identity is shown as **user.name=Kunal** and the configured email address is displayed in the terminal evidence.

```
kunal_prajapati@LAPTOP-45509TK7:~$ echo "Student Name: Kunal"
Student Name: Kunal
kunal_prajapati@LAPTOP-45509TK7:~$ git --version
git version 2.43.0
kunal_prajapati@LAPTOP-45509TK7:~$ |
```

4. Java Runtime Installation

OpenJDK 21 was installed and verified using **java --version**. The terminal evidence shows OpenJDK version 21.0.12 on Ubuntu 24.04, providing the Java runtime required for the Jenkins installation used in this lab.

A terminal window with a black background and green text. The prompt is 'kunal_prajapati@LAPTOP-45509TK7:~\$'. The command 'git config --global --list' has been executed, resulting in two lines of output: 'user.name=Kunal' and 'user.email=kunalprajapati14042005@gmail.com'. The prompt is followed by a vertical bar '|'.

```
kunal_prajapati@LAPTOP-45509TK7:~$ git config --global --list
user.name=Kunal
user.email=kunalprajapati14042005@gmail.com
kunal_prajapati@LAPTOP-45509TK7:~$ |
```

5. Jenkins Installation and Version Verification

Jenkins was installed and its version was checked using `jenkins --version`. The evidence reports Jenkins version **2.568.3**.

```
kunal_prajapati@LAPTOP-45509TK7:~$ echo "Student Name: Kunal"
Student Name: Kunal
kunal_prajapati@LAPTOP-45509TK7:~$ java -version
openjdk version "21.0.12" 2026-07-21

6. Jenkins Service Enabled and Running

The Jenkins service was enabled and started using systemd. The status output shows **enabled** and **Active: active (running)**, confirming that the Jenkins Continuous Integration Server is running correctly.

```
kunal_prajapati@LAPTOP-45509TK7:~$ echo "Student Name: Kunal"
Student Name: Kunal
kunal_prajapati@LAPTOP-45509TK7:~$ jenkins --version
2.568.3
kunal_prajapati@LAPTOP-45509TK7:~$ |
```

7. Jenkins Dashboard Verification

The Jenkins web interface was opened at **http://localhost:8080**. The Welcome to Jenkins dashboard confirms successful access to the installed Jenkins server.

```
kunal_prajapati@LAPTOP-45509TK7:~$ sudo systemctl status jenkins --no-pager

8. Commands and Observations

Key commands executed

```
lsb_release -a
echo "Student Name: Kunal"
whoami
date
sudo apt update
sudo apt install git -y
git --version
git config --global user.name "Kunal"
git config --global user.email "kunalprajapati14042005@gmail.com"
git config --global --list
sudo apt install fontconfig openjdk-21-jre -y
java --version
sudo apt install jenkins -y
jenkins --version
sudo systemctl enable --now jenkins
sudo systemctl status jenkins --no-pager
```

Observations

1. Ubuntu Linux 24.04.4 LTS was used as the lab environment.
2. Git was installed successfully and its version was verified.
3. Global Git user name and email were configured successfully.
4. OpenJDK 21 was installed and verified for Jenkins operation.
5. Jenkins 2.568.3 was installed successfully.
6. The Jenkins systemd service is enabled and active (running).
7. The Jenkins dashboard is accessible through localhost:8080.

Conclusion

Task 4 was completed successfully. Git and Jenkins were installed on Ubuntu Linux, the Git global identity was configured, Java 21 was verified, Jenkins was enabled and running as a system service, and the Jenkins dashboard was successfully accessed.
